

Additional Data for Trophy Evaluations

CIC GA70.RES01

REFERRING to the recommendation of the 49th CIC General Assembly (Istanbul, 2002) which encourages the broadcast of the knowledge of the CIC measurement formulas, through public and private initiatives;

FOLLOWING on the priorities of the CIC, in particular being “a trusted source and strategic partner on global hunting issues”, but also “sustaining our cultural heritage”;

RECOGNIZING the importance of trophy evaluation for the hunting industry, but more importantly for the establishment of a scientific foundation to evaluate the success of game management;

UNDERLINING the scientific value of such a large database of biological data on hunted animals;

UNDERSTANDING that scientific data increases the understanding of the role of hunting in nature conservation;

Further **RECOGNIZING** that geographical data collection can increase the value of biological data for regional and international comparisons;

the 70th CIC General Assembly in Cascais, Portugal, 18 – 21 April 2024

1. *Requests* the TEB to develop the Trophy Evaluation System to include, where relevant, the estimated age of the trophy animal also for non-gold medal trophies.
2. *Further requests* the TEB to ask for the location of the hunt with geographical coordinates, where national data protection regulations allow.
